PROJECTS

Ecommerce website | nodeJS, React, Thunder Client, MongoDB

Developed a full-stack eCommerce website using **React** for a dynamic frontend and **Node.js with Express** for backend APIs, tested using **Thunder Client**.

Implemented core features including **product listing**, **user authentication**, and smooth frontend–backend integration.

Used **MongoDB** for efficient data storage and retrieval; the complete project is available on **GitHub**.

Recipe Search Engine | python, React, Sqlite

A full-stack web application for searching and displaying recipes, built with a FastAPI backend for data management, a React frontend for user interaction, and a Node.js server for additional services

. The backend uses SQLite to store recipe data, providing RESTful APIs for querying recipes by title, cuisine, rating, and more. The frontend features a searchable table with pagination, filters, and a detailed drawer view, falling back to sample data if the backend is unavailable.
